Subject: Iowa Valley Auditorium Renovation

Todd, Doug, and OPNr's:

I stopped through Marengo yesterday to see the finished project at Iowa Valley. One word – WOW!

This came together very, very nicely! The new details that brought a fresh look to a worn and tired auditorium, the creative approach to highlighting historical elements (skylights, sidewall windows, reusing original fixtures, etc.) , and the restoration work of damaged plaster by skilled craftsman, has made this a great space for students and parents!!! We have a very satisfied superintendent and District!!

Please share this with the Henneman and Garliing teams – this is a great story of an aged auditorium becoming a new focal point for the community – and the combined efforts of our teams!

Roger
